## MEASUREMENT STANDARDS

### MENS

#### A / Neck

Measure around your neck at the collar level. Remember to make allowance for comfort (usually 2 fingers behind the tape).

#### B / Chest

It is important to stand naturally, keeping the tape level and straight. A firm (not tight) chest measurement should be taken.

#### C / Waist

Measure around natural waistline, keeping the tape level and straight. Do not measure over trousers.

#### D / Inside Leg

Take the measurement from the crotch to the top of the heel of the shoe.

### WOMENS

#### A / Bust

Measure around the body across the fullest part of the bust, keeping the tape level and straight.

#### B / Natural Waist

Measure around the smallest part of your natural waistline, keeping the tape level and straight. Do not measure over trousers.

#### C / Low Waist

Measure at a level approximately 4cm down from the natural waistline, keeping the tape level and straight. Do not measure over trousers.

#### D / Hips

Measure around the widest part of your hips (approximately 20-30 cm below the waist). In this position the tape measure should slide up, down and over the bottom.
